

Yellow/Red Circuit Derryrush. Nice circuit of easy problems in a beautiful lakeside setting. Bring a tarp and save for windy day. There might be an access issue here in future so keep a low profile.

Drive towards derryrush. Park after Rosmuc school before you reach turn for Pearses cottage, on right side of road at forest. Walk up forestry track north for about 5 minutes.

1: After trees, boulder behind fence on right. Short problem up groove. 5

Walk down track another 2 minutes, two boulders behind fence.

2: Whale boulder (see below), low start on ledge, use toe hook to go up, short but nice. 5

There is an unclimbed problem to the right, using the diagonal edge .

3: Slab opposite. 4

Walk west from here for 50m

4: Traverse around the lip, with or without the flake for feet 5.

Keep walking to the next group of boulders by the lake. There is a huge overhang, but doesn't seem to be any holds.

5: On smaller boulder behind the big one, climb the arete, 4.

6: Friction slab on the right, with the arete, nice topout, 5.

7: Climb the crack on the right of the overhang, 4, see below.

8: Hang on jug on left of overhang, rock over onto arete. 5+ without topping out. Top needs a clean and landing slopes away a bit.

On the back of this boulder there is a problem I didnt manage going left from this hold:

From here walk towards corner of forest to pyramid shaped boulder.

9. Slab on the right with arete, 6a. Nice, but rock a little sharp.
The right and left arete are projects.

Walk southwest, and there is a triangular boulder you can see from road.

10: Traverse the top, 4+.

Walk west from here and there are lots of tall slabby outcrops. Climb whatever looks good, landings are good bog.

Other boulders here:

At the original track keep going straight, there is an obvious arete stone boulder over stream and past the fence. More boulders down to the left, and massive one I haven't been to off the right.

At the next turn after Pearses cottage, take a right into Inbhear. Park at abandoned cottage on right. Walk across bog west to a group of boulders with trees on top. There is split boulder with a nice arete and a few other things, but it all needs a clean.
